## The Quality

At Lastolite By Manfrotto we not only make a range of innovative accessories to help photographers and film-makers shoot great imagery, but we also take pride in offering world-class products manufactured to the highest standards, ensuring they can withstand the repeated daily use of the most demanding image-maker.

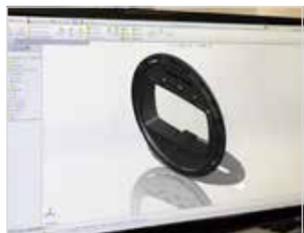

To keep our leading edge, we make significant investments into research and development to ensure that we can continue to launch new and innovative products to meet the needs of the ever-changing photo and video markets. Allied to our strict quality standards and attention to detail, we are always looking at ways to improve the way our products are manufactured, too. We are consistently developing new ideas and technology, which leads to investment in bespoke tooling and mouldings. With the vast majority of our fabric-based products made in our huge Leicestershire factory, we retain close control over quality.

High quality sprung steel is used inside all of our collapsible products. The steel is 'dressed' to ensure all the sharp edges and dirt are removed so no damage is incurred during use and provides maximum longevity. To join the ends of the steel together we use a range of specially designed, heat treated clips that guarantee a permanently strong fix for the lifetime of the product. For added peace of mind we offer a lifetime warranty on the steel rim in all of our products.

The steel rim is incorporated into our products by inserting it into our specially designed rim tape. The rim tape is made from a hard wearing, woven elasticated construction designed to withstand the typical knocks and scrapes from daily use by a busy Iimagemaker. The thick woven construction prevents the steel from wearing through and potentially weakening the structure of the product.

We apply the same level of detail and quality to all of our textiles as well. Each fabric is manufactured to meet the needs of the product, specifying the construction of the weave and the type of raw materials used. Each fabric is then coated or processed depending on the technical performance required.

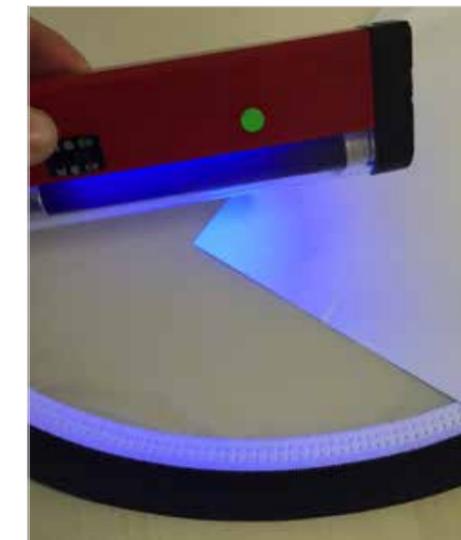

The textiles are also tested to make sure they meet the correct performance levels over repeated use and in adverse conditions. We have developed a range of over 10 different technical fabrics used to manufacture our products, including our patent protected innovative TriGrip Difflector fabric.

Our diffuser fabrics are manufactured using only the finest whiteners to reduce any chance of unwanted colourcast. The fabric is also specially coated to ensure colour balance and a uniform spread of light as it is passed through the material, avoiding typical issues such as irregular distribution and hot spots.

Our reflective surfaces are also specifically designed for our products and not general purpose textiles. We incorporate the correct level of stretch into the weave of all our fabrics to ensure the foil surface remains intact and does not crack under tension and lead to delamination. We also use the highest quality adhesive and lamination processes to ensure the foil remains bonded to the textile throughout the products lifetime and provides a uniformed opaque surface to bounce the light.

And finally to hold our products together we use a triple thread, twin needle, loop stitch which provides maximum strength and durability.

With HaloCompact Diffuser

Without HaloCompact Diffuser

**Features and Benefits**

- ▶ Ultra compact when folded down
- ▶ Lightweight construction
- ▶ Incorporates a ¼" thread in the handle
- ▶ Fits easily in a camera bag

Soft Silver

Ergonomically designed handle with useful ¼" thread

The HaloCompact boasts a patent pending design concept that makes the everyday reflector and diffuser panel even more portable than ever!

Unlike many traditional reflector/diffuser panels that incorporate a steel rim pop up design, the 82cm (32") HaloCompact is constructed using Lastolite By Manfrotto's new innovative RapidExoframe™ technology. The collapsible lightweight aluminium frame quickly slots together and the reflector or diffuser fabric simply clips onto the frame. The cleverly designed RapidExoframe™ construction allows the frame to breakdown into small multiple sections and along with the folded fabric packs into a carry case measuring only 6.5 x 27 x 6.5cm (2.5" x 10.5" x 2.5") weighing only 390g (reflector and case). The ultra-compact folded dimensions make the HaloCompact the perfect 'always with you' solution for Iimagemakers on the move.

The HaloCompact also features an ergonomically designed handle so it can easily be held and accurately positioned with one hand. The handle also incorporates a very useful ¼" thread (plus a ¼" to ¼" adaptor), enabling it to be easily attached to various different support systems, to offer secure positioning further away from camera position.

- ▶ New moulded handle with strap
- ▶ Double sided
- ▶ Collapses to a third of its original size

Silver / White

Gold / White

Sunfire / Silver

Sunlite / Soft Silver

Diffuser 1 Stop

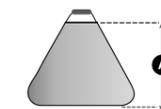

Diffuser 2 Stops

The TriGrip reflector and diffuser panels utilise a triangular design which provides a much stronger and stable structure. They also feature a moulded handle with a securing strap, allowing even more accurate positioning of the reflector with just one hand, which means that light can be directed to all those awkward spots e.g. under the chin and eyes without the need for stands or supports. The securing straps also allow you to support the reflector without actually gripping the handle, reducing the pressure on your wrist and fingers when held for prolonged periods.

**Specifications**

TriGrip Bracket

The TriGrip bracket is ideal for imagemakers who work alone and want to support the TriGrip reflector on one of our extending handles, a lighting stand, tripod or any other type of fixing bracket (a spigot connector may be required). Simply place the moulded TriGrip handle into the bracket and secure it in place with the strap. The ball joint connector enables you to then position the TriGrip exactly where you want leaving your hands free to operate the camera.

The bracket will support the TriGrip when working with ambient light or in conjunction with any other alternative light source, bouncing light off the reflector surfaces or shooting through a diffusing panel.

**Features and Benefits**

- ▶ Ideal for imagemakers who work alone
- ▶ Compact foldaway design
- ▶ Multi position ball joint connector

**Specifications**

TriGrip Bracket	Code
TriGrip Bracket*	LL LA2430

\* Not recommended for use with the large TriGrip.

# Skylite Rapid

The Skylite Rapid is the go to solution for location imagemakers who need to diffuse or reflect their light source in the most demanding situations. The Skylite Rapid's lightweight, rapid assembly, collapsible aluminium rigid frame offers ultimate stability even in windy conditions, whilst the clip on covers simply clip in place and offer a complete range of diffusion and reflective surfaces.

The Skylite Rapid frames, covers and accessories are all available separately, so you can mix and match as you choose. For greater value, kits are also available, which collapse down into a neat, compact and very portable rigid carry case.

Note: All Skylite frames are compatible with the original Skylite covers and Skylite Rapid covers.

## StudioLink Swatch

Chroma Key Green

Chroma Key Blue

## StudioLink

The StudioLink Background is a unique modular chroma key background system for use in the studio or out on location. Once assembled, multiple 3 x 3m (10' x 10') StudioLink screens can be joined together using the StudioLink Chroma Key Connection Kit (available separately) to form various configurations; side by side in a straight line or as a curvature up to the point of creating a full 360 degree enclosure. In addition, screens singularly or side-by-side can be rigged (using standard grip equipment) one above the other to create a second tier of screens.

Features and Benefits	
▶ Reversible	
▶ Chroma Key rim tape as standard	
▶ Crease resistant fabric	
▶ Fast to set up and dismantle	
▶ For inside and outside use	
▶ Collapses to a third of its original size

Rigid Case 78cm x 19cm x 14cm	LL LRCASE775
Rigid Case 103cm x 19cm x 14cm	LL LRCASE1025

The EzyFrame Vintage Background 2 x 2.3m (6'7" x 7'5") is a large format collapsible background concept offering a much larger shooting area for our highly successful vintage textured background surfaces, currently available as 1.5 x 2.1m (5' x 7") collapsible 'pop-up' style backgrounds. The extra width and height combined with the squarer format offers a substantially increased surface area allowing the enough space to pose multiple subjects and for the use of props. Ideal for isolating subjects in interviews and similar scenarios.

The EzyFrame Vintage Background features the tried and tested aluminium frame and clip on cover design used on our highly successful Skylite panels, Panoramic backgrounds and the newly launched StudioLink Chroma Key solutions. Assembled in a matter of minutes the EzyFrame Vintage background and cover packs down into a small rigid carry case measuring only 103cm x 19cm x 14cm making it extremely portable.

- ▶ Self-supporting
- ▶ Weighs only 9kg (19.8lb)
- ▶ Packs into a 100cm x 30cm x 35cm (39" x 12" x 13.5") bag

### Specifications

Panoramic Background	4m (13')
Panoramic Background - Black	LL LB7621
Panoramic Background - White	LL LB7623
Panoramic Background - Granite	LL LB7901
Panoramic Background - Limestone	LL LB7902
Panoramic Background Cover - Black	LL LB7625
Panoramic Background Cover - White	LL LB7627
Panoramic Background Cover - Granite	LL LB7903
Panoramic Background Cover - Limestone	LL LB7904

The Panoramic background is one of our widest, crease free textile surfaces. It features a collapsible three panel aluminium framework, creating a useful self-supporting wraparound structure. The fabric cover simply clips to the framework and is available in two plain surfaces – Black and White and two textured surfaces – Granite and Limestone.

The background folds down neatly into its own case and fits easily into a car.

The Panoramic Background is wide enough to shoot with multiple camera angles

## Magnetic Background Support

The Magnetic Background Support makes attaching and removing collapsible backgrounds with a steel rim very simple. The steel band located within the rim of the background attaches directly to the two magnetic housings on the crossbar. The support can be raised to its desired position and the background simply lifted into position. The Magnetic Background Support will fit to most lighting stands with a 5/8" spigot. A kit is also available which includes a Lastolite By Manfrotto LL LS1159 lighting stand and carry case.

Features and Benefits	
▶	Magnetic connectors
▶	Universal fitting
▶	Available as a kit*
▶	Holds up to 5kg (11lb)

Specifications	
Magnetic Background Support	Code
Magnetic Background Support	LL LB1120
Magnetic Background Support Kit*	LL LB1121

\*Kit includes Magnetic Background support, LL LS1159 light stand and carry case

Background support system to accommodate curtain and roll up backgrounds.	LL LA1108
Heavy duty support for paper and vinyl roll up backgrounds (metal collars)	LL LB1128
Telescopic crossbar	LL LB1119

LL LA1108

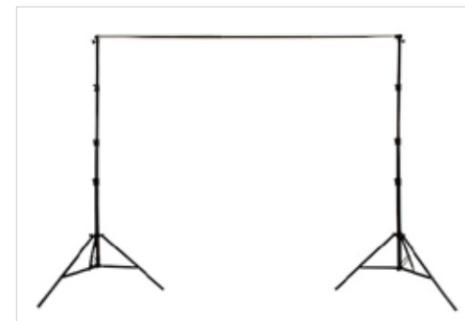

## Solo Background Support

The Solo background support features a unique pivoting cross bar which makes raising the background on the supports a much easier and safer operation. Rather than step by step adjustments at each end of the support system the new pivoting connectors allow for much greater steps without making the whole structure unstable and unmanageable. The support is available as a 3m wide or 4m wide solution. The 4m version can also be extended to 6m to accommodate wider textile backgrounds and features our heavy-duty stands. Each kit comes in a handy carry case, which fits, easily into a car.

## Background Supports

There are a number of Background support systems to accommodate curtain and roll up backgrounds.

## RayD8 c3200

The RayD8 c3200 is a continuous light studio head, incorporating a tungsten (3200k) light source.

### Features and Benefits

- ▶ S type bayonet fitting
- ▶ Removable reflector

### Specifications

RayD8 c3200 accessories	Code
1x light head, power cable and reflector* (Bulb not included)	LL LL3603
500w P 2/1 Tungsten bulb	LL LR3604

\*Base head unit is interchangeable between the c3200 and c5600

500w P2/1 Tungsten Bulb LL LR3604

LL LR3603 (Bulb not included)

## RayD8 c5600

The RayD8 c5600 is a continuous light studio head, incorporating a high output compact fluorescent bulb (equivalent to 400w), this continuous light system offers colour corrected light at 5600k (daylight).

The bulbs run at a low temperature.

### Features and Benefits

- ▶ Cool running, high output
- ▶ Colour balanced
- ▶ S type bayonet fitting
- ▶ Removable diffuser cover
