The Quality

At Lastolite By Manfrotto we not only make a range of innovative accessories to help photographers and film-makers shoot great imagery, but we also take pride in offering world-class products manufactured to the highest standards, ensuring they can withstand the repeated daily use of the most demanding image-maker.

To keep our leading edge, we make significant investments into research and development to ensure that we can continue to launch new and innovative products to meet the needs of the ever-changing photo and video markets. Allied to our strict quality standards and attention to detail, we are always looking at ways to improve the way our products are manufactured, too. We are consistently developing new ideas and technology, which leads to investment in bespoke tooling and mouldings. With the vast majority of our fabric-based products made in our huge Leicestershire factory, we retain close control over quality.

High quality sprung steel is used inside all of our collapsible products. The steel is 'dressed' to ensure all the sharp edges and dirt are removed so no damage is incurred during use and provides maximum longevity. To join the ends of the steel together we use a range of specially designed, heat treated clips that guarantee a permanently strong fix for the lifetime of the product. For added peace of mind we offer a lifetime warranty on the steel rim in all of our products.

The steel rim is incorporated into our products by inserting it into our specially designed rim tape. The rim tape is made from a hard wearing, woven elasticated construction designed to withstand the typical knocks and scrapes from daily use by a busy Imagemaker. The thick woven construction prevents the steel from wearing through and potentially weakening the structure of the product.

We apply the same level of detail and quality to all of our textiles as well. Each fabric is manufactured to meet the needs of the product, specifying the construction of the weave and the type of raw materials used. Each fabric is then coated or processed depending on the technical performance required.

The textiles are also tested to make sure they meet the correct performance levels over repeated use and in adverse conditions. We have developed a range of over 10 different technical fabrics used to manufacture our products, including our patent protected innovative TriGrip Difflector fabric.

Our diffuser fabrics are manufactured using only the finest whiteners to reduce any chance of unwanted colourcast. The fabric is also specially coated to ensure colour balance and a uniformed spread of light as it is passed through the material, avoiding typical issues such as irregular distribution and hot spots.

Our reflective surfaces are also specifically designed for our products and not general purpose textiles. We incorporate the correct level of stretch into the weave of all our fabrics to ensure the foil surface remains intact and does not crack under tension and lead to delamination. We also use the highest quality adhesive and lamination processes to ensure the foil remains bonded to the textile throughout the products lifetime and provides a uniformed opaque surface to bounce the light.

And finally to hold our products together we use a triple thread, twin needle, loop stitch which provides maximum strength and durability.

Diffuser Cover 2 Stop	LL LR3303

HaloCompact Reflector Silver/White

HaloCompact Diffuser 2 Stop

The HaloCompact boasts a patent pending design concept that makes the everyday reflector and diffuser panel even more portable than ever!

Unlike many traditional reflector/diffuser panels that incorporate a steel rim pop up design, the 82cm (32") HaloCompact is constructed using Lastolite By Manfrotto's new innovative RapidExoFrame™ technology. The collapsible lightweight aluminium frame quickly slots together and the reflector or diffuser fabric simply clips onto the frame. The cleverly designed RapidExoFrame™ construction allows the frame to breakdown into small multiple sections and along with the folded fabric packs into a carry case measuring only 6.5 x 27 x 6.5cm (2.5" x 10.5" x 2.5") weighing only 390g (reflector and case). The ultra-compact folded dimensions make the Halo Compact the perfect 'always with you' solution for Imagemakers on the move.

The HaloCompact also features an ergonomically designed handle so it can easily be held and accurately positioned with one hand. The handle also incorporates a very useful ¼" thread (plus a ¼" to ¼" adaptor), enabling it to be easily attached to various different support systems, to offer secure positioning further away from camera position.

Silver / White

Diffuser, 2 Stops

Ergonomically designed handle with useful ¼" thread

With TriGrip Reflector

Without TriGrip Reflector

TriGrip

TriGrip designed by Gary Astill. A registered design.

Features and Benefits

- ▶ Hold the reflector with just one hand
- ▶ Hold 2 reflectors, one in each hand
- ▶ New moulded handle with strap
- ▶ Double sided
- ▶ Collapses to a third of its original size

Silver / White

Gold / White

Sunfire / Silver

Sunlite / Soft Silver

Diffuser 1 Stop

Diffuser 2 Stops

The TriGrip reflector and diffuser panels utilise a triangular design which provides a much stronger and stable structure. They also feature a moulded handle with a securing strap, allowing even more accurate positioning of the reflector with just one hand, which means that light can be directed to all those awkward spots e.g. under the chin and eyes without the need for stands or supports. The securing straps also allow you to support the reflector without actually gripping the handle, reducing the pressure on your wrist and fingers when held for prolonged periods.

Features and Benefits

- ▶ Ideal for imagemakers who work alone
- ▶ Compact foldaway design
- ▶ Multi position ball joint connector

Specifications

TriGrip Bracket	Code
TriGrip Bracket*	LL LA2430

* Not recommended for use with the large TriGrip.

TriGrip Bracket

The TriGrip bracket is ideal for imagemakers who work alone and want to support the TriGrip reflector on one of our extending handles, a lighting stand, tripod or any other type of fixing bracket (a spigot connector may be required). Simply place the moulded TriGrip handle into the bracket and secure it in place with the strap. The ball joint connector enables you to then position the TriGrip exactly where you want leaving your hands free to operate the camera.

The bracket will support the TriGrip when working with ambient light or in conjunction with any other alternative light source, bouncing light off the reflector surfaces or shooting through a diffusing panel.

LL LA8446 Skylite Rapid Griphead

The Skylite Rapid cover simply clips to the frame

Skylite Rapid Kit

Skylite Rapid Rigid Case

Skylite Rapid

Rigid Case 103cm x 19cm x 14cm	LL LRCASE1025

The Skylite Rapid is the go to solution for location imagemakers who need to diffuse or reflect their light source in the most demanding situations. The Skylite Rapid's lightweight, rapid assembly, collapsible aluminium rigid frame offers ultimate stability even in windy conditions, whilst the clip on covers simply clip in place and offer a complete range of diffusion and reflective surfaces.

The Skylite Rapid frames, covers and accessories are all available separately, so you can mix and match as you choose. For greater value, kits are also available, which collapse down into a neat, compact and very portable rigid carry case.

Note: All Skylite frames are compatible with the original Skylite covers and Skylite Rapid covers.

EzyBalance for Scuba Divers	
30cm (12") 18%	LL LR1252

EzyBalance 18%

EzyBalance 18% (divers version) LL LR1252

The EzyBalance is a handy double-sided 'pop up' 18% grey/white card, which simplifies the complex technical issues surrounding exposure and colour correction when working in different lighting conditions. A unique focusing target enables the camera to focus on the card and take the necessary readings. A waterproof version is also available for scuba divers. Available in 3 sizes.

EzyBalance used to correct the light on the subject from 'Daylight' LED Key light and create a warm light effect from the Tungsten light source behind.

Panoramic Chromakey Green Swatch

Green

Panoramic Chromakey Green Background

Features and Benefits

- ▶ Up to 4m (13') wide and 2.3m (7'5") high
- ▶ Self-supporting
- ▶ Weighs only 9kg (19.8lb)
- ▶ Packs into a 100cm x 30cm x 35cm (39" x 12" x 13.5") bag

Specifications

Panoramic Background	4m (13')
Panoramic Background - Green	LL LB7622
Panoramic Background Cover - Green	LL LB7626

The Panoramic background is one of our widest, crease free textile surfaces. It features a collapsible three panel aluminium framework, creating a useful self-supporting wraparound structure. The Chromakey Green fabric cover simply clips to the framework.

The background folds down neatly into its own case and fits easily into a car.

The Panoramic background is one of our widest, crease free textile surfaces. It features a collapsible three panel aluminium framework, creating a useful self-supporting wraparound structure. The fabric cover simply clips to the framework and is available in two plain surfaces – Black and White and two textured surfaces – Granite and Limestone.

The background folds down neatly into its own case and fits easily into a car.

The Panoramic Background is wide enough to shoot with multiple camera angles

Magnetic Background Support

The Magnetic Background Support makes attaching and removing collapsible backgrounds with a steel rim very simple. The steel band located within the rim of the background attaches directly to the two magnetic housings on the crossbar. The support can be raised to its desired position and the background simply lifted into position. The Magnetic Background Support will fit to most lighting stands with a 5/8" spigot. A kit is also available which includes a Lastolite By Manfrotto LL LS1159 lighting stand and carry case.

Features and Benefits

- ▶ Magnetic connectors
- ▶ Universal fitting
- ▶ Available as a kit*
- ▶ Holds up to 5kg (11lb)

Specifications

Solo Background Support

Features and Benefits

- ▶ Single user operation
- ▶ Unique pivoting cross bar
- ▶ 3m, 4m and 6m widths, up to 2.8m high

Specifications

Solo Background Support	Code
Solo Background Support 3m (10')	LL LB1105
Solo Background Support 4m (13') Heavy Duty	LL LB1142
Solo Background Support Extension 2m (6.5')*	LL LB1143

*For 4m Background Support only

Solo Support Brackets

The Solo background support features a unique pivoting cross bar which makes raising the background on the supports a much easier and safer operation. Rather than step by step adjustments at each end of the support system the new pivoting connectors allow for much greater steps without making the whole structure unstable and unmanageable. The support is available as a 3m wide or 4m wide solution. The 4m version can also be extended to 6m to accommodate wider textile backgrounds and features our heavy-duty stands. Each kit comes in a handy carry case, which fits, easily into a car.

Background Supports
